ARIHANT HOSPITAL

OUR EXPERTISE AND SPECIALTIES

Thriving on innovation, our outstanding hospital staff and state-of-the-art care have garnered worldwide acclaim for patient satisfaction.

Arihant Hospital is a unit of Dixit Healthcare Pvt Ltd., a 100-bed multi-speciality hospital with state-of-the-art infrastructure - hi-tech modular operating rooms, a cath lab, ITU, CCU, ICU, and five-star rooms. We also offer some of the best patient services in the area!

We believe that exceptional patient care begins with our staff. We have some of the most skilled, compassionate doctors and nurses who have many achievements. We're proud that many of our doctors have been recognised by their peers for their field expertise.

Whether you are seeking treatment for a condition such as heart disease or cancer, or you would like to learn

about bariatric surgery options, we can help you find a solution that fits your needs.

We have an Ambulance, 24/7 Pharmacy, Pathology, CT Scans and X-rays facility.

Arihant Group has flourished under the leadership of **Sahakar Ratna Shri Raosaheb Patil and his sons, Shri. Abhinandan and Shri. Uttam Patil**. As a group involved in multiple sectors like cooperative societies, education, farming, entrepreneurship, textile, sugar industries and skill development, Arihant Group wanted to give more to the community through healthcare after seeing the havoc caused by the Covid pandemic.

DR. MAHADEV D. DIXIT

Chief Cardiac Surgeon | MBBS, MS (General Surgery), DNB (CVTS), FIACS, PhD

The healthcare profession is a demanding one. It requires a special kind of person who thinks it's a special mission, a devotion and the willingness to help others.

“WE MUST RECOGNISE THE TIRELESS EFFORTS OF THE MANY INDIVIDUALS WHO UNDERTAKE CRUCIAL TASKS DAILY. THE SIGHT OF A WHITE COAT CLEARLY INDICATES THE UNWAVERING DEDICATION TOWARDS MAKING A POSITIVE IMPACT. THE DECISION TO DEVOTE ONESELF TO SERVING OTHERS MAKES OUR LIVES TRULY FULFILLING.”

OPERATIONS

33
YEARS OF
EXPERIENCE

Dr. Mahaadev D. Dixit is one of India's most esteemed cardiac surgeons, with over 33 years of experience in open heart surgeries.

He has performed 30,000 plus open heart surgeries in his astounding career, of which 5000 are pediatric. He is constantly involved in complex pediatric cardiac surgeries like Arterial Switch Procedures, Pulmonary Conduits, Fontan procedures, Sennigs procedures, etc. He is one of the few doctors who operate on the entire spectrum of cardiac surgeries - from neonatal to transplants, including Minimal Access Surgeries. He has also performed Neonatal cardiac surgery on a baby weighing 900 grams.

He has an MBBS degree from JNMC, Belagavi and MS in General Surgery from Government Medical College, Bellary. He received his Diplomate of National Board - Cardiovascular

Thoracic Surgeon from Bombay Hospital, Institute of Medical Sciences, Bombay. He was the first person who operated Robotic Heart surgery in Karnataka.

Dr. Dixit is a life member of the Society of Pediatric Surgeons: USA, the European Association of Cardiothoracic Surgeons, a Trustee at Asia Heart Foundation, involved in building heart hospitals across the country, and the Chairman of Priyadarshini Eye Healthcare and Research Foundation Belagavi.

Earlier, Dr. Dixit worked as a Professor & HoD of CTVS and has been a keen teacher and examined for both MCh (CVTS) & DNB (CVTS). His research, Bent of Mind, led him to obtain his PhD from KLE University; at present, his field of study has played an influential role in the aetiology of Coronary Artery.

CARDIAC CARE

OUR TEAM IS DEDICATED TO YOUR HEALTH - 24/7

We have an excellent team of Cardiac Care professionals dedicated to providing our patients with the best care. Our surgeons and cardiologists are among the best in the country, and they are supported by a team of senior Cardiac Technologists, Cardiac Anaesthetists and Perfusionists. Our goal is to provide care 24/7 so that no matter what time of day or night, you can rest assured that your loved one will get the best possible care here.

We pride ourselves on being able to handle any complicated process or surgery at short notice. Our team will be there for you whether you need a simple procedure or an emergency operation.

NON-INVASIVE CARDIOLOGY

- 3D Trans Oesophageal Echocardiography
- Dobutamine Stress Echo and Contrast
- Holter monitoring / 24-hour Ambulatory BP Monitoring
- Tilt Table Testing
- OCT
- TAVI
- State-of-the-art Cath Lab
- EVAR for Aortic Aneurysms
- Intra Aortic Balloon Pump
- ECMO - Extra Corporeal Membrane Oxygenation

INVASIVE CARDIOLOGY

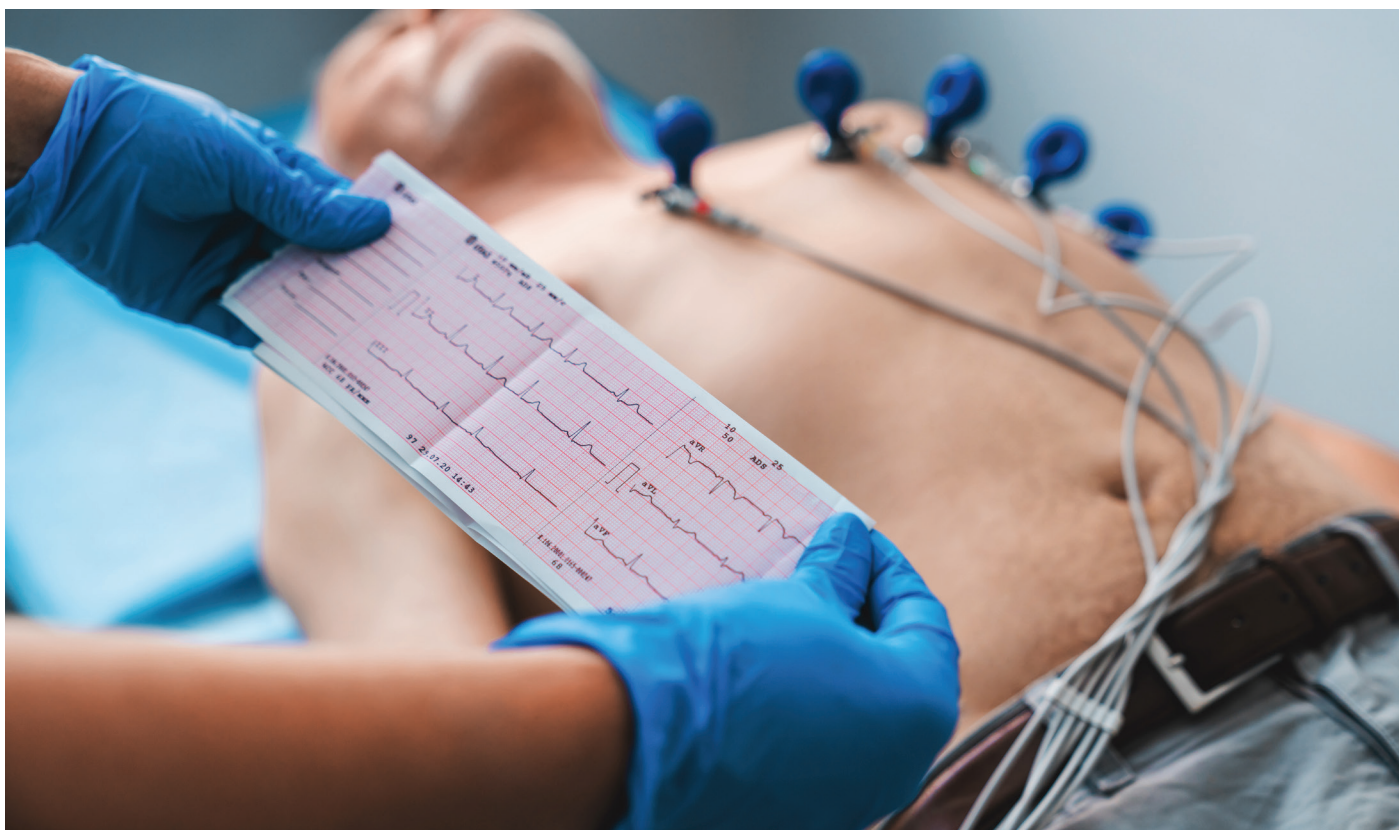

High-end Hybrid Cath lab Diagnostic Procedures n Coronary Angiogram

- FFR

- Cardiac catheterization Coronary interventions n PTCA with stent implantation
- Primary PTCA
- Complex PTCA - includes Rotablation
- PTSMA

VALVULAR INTERVENTIONS

- BMV
- PBVD
- ABVD
- TAVR Interventions For Congenital Heart Diseases
- We are equipped to handle all age groups from neonates to adults with congenital heart diseases. n BAS
- Closing holes in the heart (ASD, VSD, PDA)
- Coarctation Balloon Dilatation and Stenting
- PDA stenting in duct dependent babies Peripheral Vascular interventions n PTA
- Carotid Stenting, Renal Stenting, Vascular Artery Stenting
- EVAR for Aortic Aneurysms
- Angiography/ Angioplasty

CARDIOTHORASIC SURGERY (CTVS)

WE'RE ALL ABOUT ONE THING: EXCEPTIONAL PATIENT CARE.

At Arihant Hospital, we have the most advanced technology and equipment available in cardiac surgery. This is a state-of-the-art facility with highly trained doctors, nurses and technicians. Our surgeons offer the whole spectrum of cardiac surgical procedures, which include Adult Cardiothoracic and Vascular Surgeries and Paediatric Cardiac Surgery. The Head of the Cardiothoracic and Vascular Surgery department has performed among the largest number of surgeries in Karnataka and has achieved the highest degree of success. This means you can trust our doctors to perform your operation safely, quickly, and with minimal complications.

MINIMALLY INVASIVE CARDIAC SURGERY (MICS)

This is performed through small incisions either on the right or left of the chest. Surgeons perform the same complex heart surgery through small incisions, as an alternative to sternotomy. MICS is safe & effective and can be applicable for performing a wide range of heart surgeries.

SURGERIES

- ASD / Mitral Valve Repair and Replacements / AVR / CABG

PROCEDURES

The department is equipped with the best machines manned by highly skilled technologists and doctors.

- Coronary Bypass Surgery / Beating Heart Surgery (off-pump)

- Heart Valve Replacement Surgery
- Mitral and Aortic Valve Repair Surgery
- Heart failure Surgeries
- BT shunt - inserting a tube to / Glenn / PA Banding
- Closure of septal defects - ASD, VSD, ICR, TOF and all types of Complex Surgeries
- Arrhythmia procedures

BENEFITS

- Less pain and less risk of infection.
- Reduces ICU and Hospital stay
- Less blood loss and blood transfusions
- Early return to work (3 to 5 Days Stay)

WHEN THE UNEXPECTED HAPPENS, WE'RE READY 24/7.

WE UNDERSTAND THAT WHEN YOU'RE IN AN EMERGENCY, TIME IS OF THE ESSENCE.

Arihant Hospital is ready to take care of you no matter what time of day it is.

We provide a full range of medical services, including emergency and critical care and traditional outpatient treatments.

Our state-of-the-art facilities and technologies allow us to provide immediate and lifesaving care in any situation, whether a simple emergency or a complex medical issue.

We're here whether you need swift treatment for a cardiac arrest or an ambulance to bring your loved one to the hospital. Our fully equipped ambulances and ventilators are on stand-by 24/7, ready to help with any cardiac care emergency and treatment.

A pharmacy and laboratory always operate around the clock to support our emergency care services.

- Respiratory Failure
- Pneumothorax
- Pulmonary Embolism
- Cardiac Tamponade

OTHER FACILITIES

- Ambulance Service 24/7
- Pharmacy 24/7

CRITICAL CARE UNIT

ONE OF THE BEST MEDICAL CARE FOR YOUR LOVED ONES

We know you want only the best for your family when you need the best possible treatment. At Arihant Hospital we offer a state-of-the-art **Critical Care Unit** (CCU) to ensure your loved one gets the treatment they need.

If an individual has suffered a heart attack, requires close monitoring following heart failure, has a severe heart condition such as arrhythmia, cardiomyopathy, unstable angina, or heart infection, or is recovering from heart surgery, treatment in a specialised cardiac care unit is necessary.

In the CCU, healthcare professionals like doctors and nurses possess specialised knowledge in heart-related conditions and systemic intensive care. This knowledge is crucial as patients in the CCU frequently encounter other critical health complications such

as kidney failure, respiratory failure, sepsis, and infection and ensure optimal recovery and prevent further complications..

The CCU has the latest medical technology, including ventilators and dialysis machines. In addition, our ICU has the facility for **Extracorporeal Membrane Oxygenation (ECMO)** for patients who require support after being on a ventilator. To provide appropriate care for critically ill patients around the clock, seven days a week, Arihant Hospital has a team of trained intensivists who recognise life-threatening symptoms and promptly initiate treatment.

FACILITIES

- Dialysis
- ECMO - Extracorporeal Membrane Oxygenation
- IABP - Intra-Aortic Balloon Pump
- ARDS - Acute Respiratory Distress Syndrome

CCU at Arihant Hospital

GASTROENTEROLOGY AND BARIATRIC SURGERY

WITH A NEW ERA OF LIVER CARE, A HEALTHIER FUTURE IS AT YOUR FINGERTIPS.

Arihant Hospital is proud to announce the **Comprehensive Liver Care Centre** launch in Belagavi as part of its effort to bring super speciality care care care to North Karnataka. In collaboration with the **Institute of Laparoscopy & Gastroenterology** (ILG) Hubballi, this centre will provide a complete range of treatments for liver diseases.

The Comprehensive Liver Care Centre will offer advanced treatment options for various liver ailments, including Biliary Tract Disease, Alcoholic Liver Disease and Non-alcoholic Fatty Liver Disease (NAFLD). With treatments ranging from laparoscopic surgery to minimally invasive procedures like Transcatheter Arterial Chemoembolization (TACE), our experts are well-equipped to treat even the most severe cases of liver disease. The state-of-the-art technology and expertise available at this facility will help patients receive better care at one of the most advanced hospitals in India.

Cath Lab at Arihant Hospital

UROLOGY AND NEPHROLOGY

EXPERT DIAGNOSIS AND TREATMENT FOR CHALLENGING UROLOGICAL DISORDERS

At Arihant Hospital, we're proud to provide a full range of urological services. Our team of skilled urologists is known for diagnosing and treating the most challenging urological disorders. We can treat kidney stones, address incontinence, restore fertility, and more.

We treat patients with renal stones using minimally invasive procedures that are less expensive and more effective than traditional surgery. We also provide treatment for incontinence through a minimally invasive procedure called TOTEM (transobturator tape). In addition, we offer other services, such as robotic surgery and laparoscopic surgery.

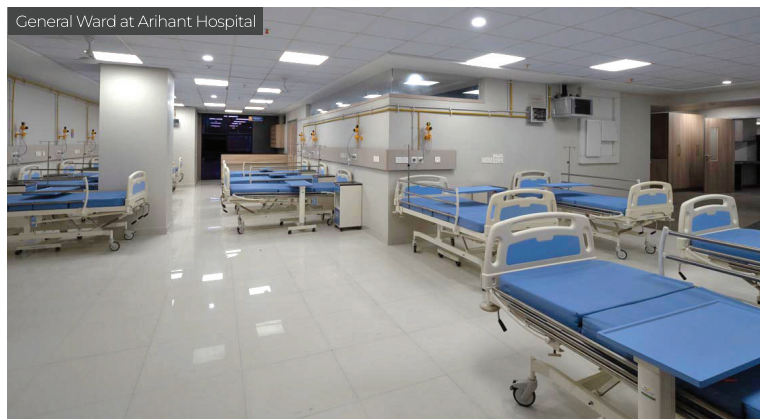

PROCEDURES

- Urinary Tract Infection
- Kidney Infection (Pyelonephritis)
- Cystoscopy
- Ureteroscopy
- Nephrectomy

SURGERIES

- Kidney Stones.
- Kidney Stones in children.
- Medical Tests for prostate problems.
- Perineal Injury in men
- Prostate Enlargement (Benign Prostatic Hyperplasia)
- Prostate Inflammation (Prostatitis)

General Ward at Arihant Hospital

IT'S THE LITTLE THINGS THAT MATTER

TODAY'S ACHIEVEMENTS ARE TOMORROW'S STEPPING STONES

Rare surgery performed for third time at Aриhant Hospital!

A 78-year-old man from Belgaum City was successfully treated at the renowned Aриhant Hospital, Belagavi. TAVI, i.e., Transcatheter Aortic Valve Replacement, a complicated procedure that involves the replacement of the damaged valve without any incision was successfully performed. With this surgical procedure, the patient's damaged aortic valve was replaced without any incision under the leadership of Dr. Dixit, Dr. Anmol Sonve, Dr. Prabhu Halkatti, and Dr. Prashant M. B.

Karnataka's 1st & India's 2nd Carotid Artery TAVI performed

A team of doctors at Aриhant Hospital successfully performed a TAVI procedure on 1st November 2022 on a 75-year-old woman from Sangola City. She was admitted with shortness of breath due to severe aortic stenosis, and the surgery carried high risk because she was cachexic.

This non-surgical (TAVI) procedure was carried out by Dr Anmol Sonawe, Dr M D Dixit, Dr Prabhu Halkati, Dr Prashant M B, and Dr Amrish Nerlikar.
